

NEXORA INSTITUTE OF TECHNOLOGY

Attendance

1. Minimum Attendance

Students are required to maintain at least 75 percent attendance in each course to be eligible for the semester examination under the standard sample policy.

2. Attendance Calculation

Attendance is calculated using the number of classes attended compared with the number of scheduled classes for the course. Laboratory and practical attendance may be recorded separately where applicable.

3. Shortage of Attendance

Students with attendance below the required level may be prevented from appearing for examinations unless they qualify for an approved relaxation under the current institute rules.

4. Attendance Relaxation

Requests for attendance relaxation must be submitted through the prescribed process with supporting documentation when required. Approval is not automatic.

5. Attendance Records

Students should regularly check attendance records published by their department and report discrepancies promptly to the concerned faculty or department office.

6. Important Reminder

If a newer circular changes the attendance requirement for a specific semester or program, the latest approved circular takes precedence over this general handbook section.
