

NEXORA INSTITUTE OF TECHNOLOGY

Courses

1. B.Tech Programs

Program	Duration	Main Areas
Computer Science and Engineering	4 years	Programming, databases, AI, software engineering
Information Technology	4 years	Web technologies, cloud, networking, information systems
Electronics and Communication Engineering	4 years	Digital systems, communication, embedded systems
Electrical and Electronics Engineering	4 years	Power systems, machines, control systems
Mechanical Engineering	4 years	Design, manufacturing, thermal engineering
Civil Engineering	4 years	Structures, construction, transportation, environmental engineering

2. Academic Year

The B.Tech program consists of eight semesters. Each semester includes theory courses, laboratory courses, projects, and other academic activities according to the approved curriculum.

3. Department Support

Students should approach their department office for timetable changes, course registration, laboratory schedules, faculty information, and academic concerns.

4. Electives

Professional and open electives may be offered based on the curriculum and faculty availability. The institute may publish separate registration instructions for each semester.
